

	Ball Acceleration	Opponent Slowdown	Power Steal	Player Acceleration	Extended Reach	Power Swap
Definition	The player infuses the ball with stored energy, granting it a speed boost that can catch the opponent off guard. The ball remains accelerated until the opponent touches it or a goal is scored.	The player emits an electromagnetic pulse that slows the opponent until they return the ball or a goal is scored.	The player steals the opponent's charged power. As compensation, the opponent gains a random 70–80% Energy charge. If the opponent has no charged power, a percentage of their current Energy is stolen instead. If the opponent has no Energy, nothing happens.	The player converts their stored Energy into a movement speed boost until they hit the ball or concede a goal.	The player projects an energy beam upward and downward to cover the goal. It must be timed precisely, as it lasts only a fraction of a second.	The player receives a random power from the available pool, except Power Swap itself.
Ball Acceleration	If the accelerated ball is successfully returned, the player gains a random 50–60% additional Energy charge ('Bonus Charge'). If a power is already charged, the Bonus Charge is granted after that power is used. It cannot stack.	No effect.	If the opponent has Ball Acceleration charged along with Bonus Charge, activating Power Steal removes Ball Acceleration and immediately grants the stored Bonus Charge.	No effect.	No effect.	No effect.
Opponent Slowdown	No effect.	If the ball is successfully returned while slowed, the player gains a random 50–60% Bonus Charge. If a power is already charged, the Bonus Charge is granted after it is used. It cannot stack.	If the opponent has Opponent Slowdown charged along with Bonus Charge, activating Power Steal removes Opponent Slowdown and immediately grants the Bonus Charge.	If the player is slowed, activating this power removes the slowdown and restores normal movement speed. If Opponent Slowdown is activated while Player Acceleration is already active, the player returns to normal speed.	No effect.	No effect.
Power Steal	No effect.	No effect.	If both players have Power Steal charged and one activates it, an electromagnetic burst accelerates the ball for the rest of the rally. Both players' Energy is immediately reduced to 0. Any stored Bonus Charge is also removed from both players.	No effect.	No effect.	No effect.
Player Acceleration	No effect.	No effect.	If the opponent has Player Acceleration charged along with Bonus Charge, activating Power Steal removes Player Acceleration and immediately grants the Bonus Charge.	No effect.	No effect.	No effect.
Extended Reach	No effect.	No effect.	If the opponent has Extended Reach charged along with Bonus Charge, activating Power Steal removes Extended Reach and immediately grants the Bonus Charge.	No effect.	No effect.	No effect.
Power Swap	No effect.	No effect.	If the opponent has Power Swap charged along with Bonus Charge, activating Power Steal removes Power Swap and immediately grants the Bonus Charge.	No effect.	No effect.	No effect.
